Verti Fiber

Used in outdoor cushions and mattresses.

A long lasting and resilient bonded dacron. The fibers are layered vertically instead of horizontally so they stand on end. Each fiber acts like a tiny spring.

EZ-Dri

EZ-Dri polyether-polyurethane foam outdoor cushions

dry almost immediately after exposure to rain, salt spray, melting snow, morning dew, washing, or other forms of moisture and humidity. Large, open pores permit maximum water drainage and air circulation, allowing use quickly after being wet or even saturated. With EZ-Dri outdoor cushioning materials you can offer your customers the best of both worlds – long lasting wear and comfort combined with extremely fast drying properties.

Consider these advantages for your outdoor recreational cushions – and your customers:

- **Sheds water like a sieve**, yet provides the seating comfort of a foam. Large, completely open pores (reticulation) permit rapid draining and maximum air circulation for fast drying.
- **Unique proprietary formulation** enhances strength and durability for long term exposure to sun and inclement weather.
- **Resistant to most chemicals** including most cleaning agents, solvents, alkalies, and acids (*bleach may cause rapid discoloration*). Built-in fungicidal additive inhibits fungus, mildew – important for retarding stain and odor.
- **Compound shapes for unusual cushion designs** may be easily fabricated. EZ-Dri cushions can be shaped the same as conventional foam.
- **Resilient, “springy” characteristics enhance comfort**; EZ-Dri cushions may also be lightly overwrapped with non-woven fiber padding for extra plushness. After wrapping, test cushions to ensure proper drainage. Adjust padding density as necessary. Pores should not be blocked with adhesive.
